

*1 ABSTRACT OF DISCLOSURE

2

3 A system for transferring funds and a video message employs an
4 enclosure at a local station managed by a local agent. The enclosure
5 includes recording equipment and a telephone linked by an automatic
6 dialer to a call center that takes an order from the sender to transfer
7 funds to a beneficiary at a remote destination. The recording
8 equipment records the video message after the order is taken. The
9 video message is forward to a remote agent at the remote destination
10 from whom the beneficiary redeems the funds and is given the video
11 message.
